Comments:

Dear Honorable Committee Members:

Please support SCR23, which would take steps to limit plastic pollution.

Many plastics leach suspected carcinogens and neurotoxins as they degrade into smaller and smaller pieces, and studies show some of these toxins are slowly accumulating in the fatty tissues of humans and other animals.

Whales, sea turtles, fish and birds commonly mistake plastic for food. The “Great Garbage Patch” circulating between Hawaii and California is steadily growing. Plastic is not biodegradable and only degrades into smaller and smaller pieces, thereby contaminating the lowest levels of the food web.

Additionally, many plastics are made with petroleum, the manufacture of which is a great contributor to the heat-trapping gases responsible for the greenhouse effect we are now seeing.

For these reasons, cities in the US and around the world are banning certain types of plastics such as polystyrene, or instituting measures to cut down on plastic pollution.

Thank you for your time and the opportunity to present my testimony.

Andrea Quinn
